

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listing, of claims in the application.

Claims 1-13 (Cancelled)

14. (Currently amended) A cytomodulating conjugate for administration to a mammalian host, said conjugate ~~consisting~~ comprising conjugate members, wherein said conjugate members are other than an antibody and consists of folate joined to a selective member moiety, wherein said selective member ~~is moiety is other than an antibody or fragment thereof and consists of an~~ antigen to which the host has been previously sensitized or to which the host has natural immunity.

15. (Currently amended) The conjugate of Claim 14, wherein said selective member moiety is selected from the group consisting of a blood group antigen, a xenoantigen, and at least a portion of a vaccine antigen.

16. (Currently amended) The conjugate of Claim 14, wherein said selective member moiety binds to anti- α -gal antibodies.

17. (Currently amended) The conjugate of Claim 16, wherein said selective member moiety is the α -galactosyl epitope.

18. (Currently amended) The conjugate of Claim 14, wherein said selective member moiety comprises an antigen selected from the group consisting of an oligosaccharide A antigen, an oligosaccharide B antigen, a vaccine antigen, and fluorescein isothiocyanate (FITC).

19. (Currently amended) A cytomodulating conjugate comprising conjugate members, wherein said conjugate members are other than an antibody and consists ~~consisting~~ of folate joined to a selective member ~~moiety~~, wherein said selective member moiety ~~is other than an~~

~~antibody or fragment thereof and consist of~~ an epitope selected from the group consisting of the galactosyl epitope Gal α 1-3 Gal β 1-4 GlcNAc-R, a blood group antigen, a xenoantigen, HIV, a vaccine antigen, a minor histocompatibility antigen, and fluorescein isothiocyanate (FITC).

20. (Currently amended) A conjugate consisting of folate covalently joined to a galactosyl epitope Gal α 1-3 Gal β 1-4 GlcNAc-R.

21. (Currently amended) The conjugate of Claim 14, wherein said selective member is moiety ~~consists essentially of~~ fluorescein isothiocyanate (FITC).

22. (Currently amended) The conjugate of Claim 19, wherein said selective member is moiety ~~consists essentially of~~ fluorescein isothiocyanate (FITC).
